

interfaces irb.60
address 10.2.2.20/24

```

Vlans MANAGEMENT
{
  vlan-id 60;
  l3-interface irb.60;
}
  
```

both trunk ports are
passing vlan 60

interfaces irb.60
address 10.2.2.10/24

```

Vlans MANAGEMENT
{
  vlan-id 60;
  l3-interface irb.60;
}
  
```

```

ge-0/0/15
vlan-tagging;
unit 0 {
  vlan-id 60;
  family inet {
    address 10.2.2.1/24;
  }
}
  
```

Challenge:

SW1 can ping both SRX and SW2.

SW2 and SRX cant ping each other .

SW1 and SRX have full ARPs
but SW2 resolves SW1 ARP only.
